

Cecelia A McCluer:

I have a friend who has been in/out of long term facilities over the years due to Parkinson's disease. The stories she has told me were beyond belief. The STNA's are known to be cruel and uncaring. She reported to me on several occasions she was afraid to put a call light on to use the restroom due to being pinched on the back of the arm during transfer for asking too many times to use the toilet. With camera's in rooms, employees would be held more accountable for both what they do and do not do when caring for a resident. I am in full support of this bill being passed.
