Health Provider Services Committee

Ohio House of Representatives

Dear Committee,

I am asking Representatives to support H.B. 319, prohibiting discrimination for refusing all medical interventions, including vaccines.

FREE American Citizens must always have the fundamental and unalienable rights to bodily autonomy and informed consent. My freedoms come from God and granted in the Constitution and Bill of Rights. No government agency, or other entity, shall infringe on our rights!

No individual should be forced to take a medical treatment for another person's benefit. I believe the Nuremberg Trials were framed around this mis-justice! My family also has multiple allergies to food & medications, and we have religious beliefs which prohibit certain substances from polluting our bodies. God is our healer, counselor, and guide - NOT the government. We reject any notion that our medical freedoms are in control of any other entity.

I urge the Committee to SUPPORT HB 319 and to move this quickly through committee.

Sincerely,

Pater and Susan Holmes
