

Chair Lipps, Vice Chair Stewart, and members of the House Public Health Policy Committee,

My name is Elizabeth Mancuso, and I am a third-year medical student at OU-HCOM. I am a constituent of Columbus, Ohio (43212). I am writing in support of House Bill 89 “Regards intimate examination of anesthetized, unconscious patient”. As a medical student, I would not feel comfortable participating in a pelvic exam where a woman did not consent to it being done. Additionally, as a woman I would not want anyone inside my female anatomy that did not get my explicit consent prior to it being done. Thank you for your time and consideration.

Sincerely,

Elizabeth, Mancuso
